

JJ3004GS-01M-4

-Overlock machine for overedging-

1 needles, 3 thread high speed overlock machine for budge overedging. By attaching the device, it is now possible to sew patches and other items.

This model is compatible with various shapes like circle and pentagon.

Available shapes

You can choose the circle diameter range from 65mm to 90mm.

Various type of shapes are able to make like in pictures.

Useful functions

Using only rollers is suitable for various shapes.

Devices for thread tension release allow the fabric to pull out easily. This device works by pressing the pedal backwards.
